Project Overview

What SmartERP Delivers

Integrated POS & ERP
platform for retail and wholesale operations

Centralizes
sales, inventory, finance, HR and reporting in one system

Provides real-time
operational visibility through dashboards and analytics

Designed for
faster decisions, better control and smoother daily workflows

SMARTERP
ELECTRONICS

Problem Statement

Why This System Is Needed

Scattered Data

Business data is often scattered across paper records, spreadsheets and separate tools.

Manual Tracking

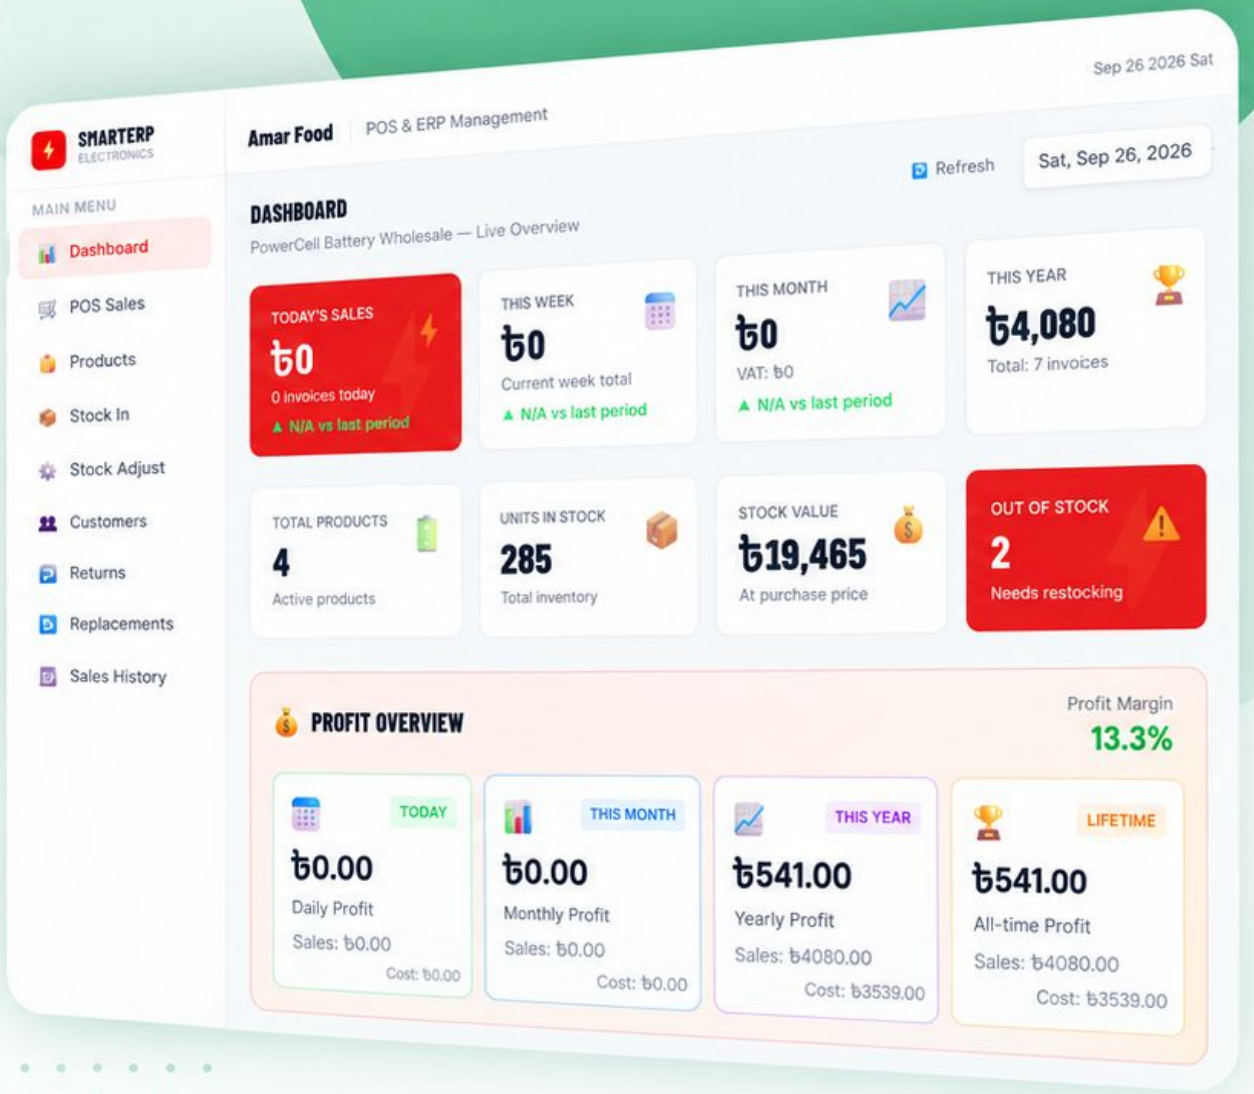

Manual sales and stock tracking causes errors, duplication and slow reporting.

Limited Visibility

Limited visibility makes it difficult to monitor revenue, stock value and restocking needs.

Disconnected Teams

Disconnected HR, finance and operations reduce overall efficiency.

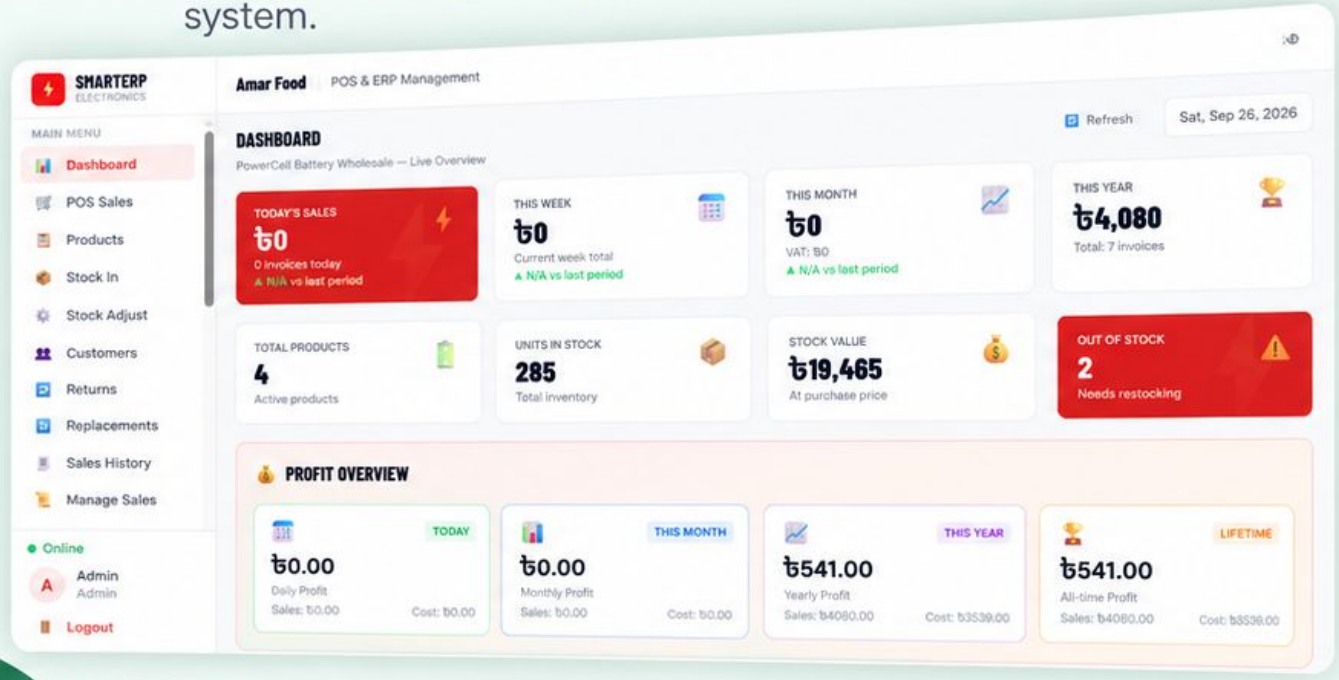

Need: A unified digital platform for daily business management

Proposed Solution & Objectives

Solution

SmartERP provides a centralized POS & ERP platform that connects operations, people and data through a single dashboard-driven system.

Objectives

- Digitize core business processes
- Improve inventory and sales visibility
- Support finance and HR management
- Enable faster reporting and smarter decisions

SMARTERP
ELECTRONICS

Core Modules & Features

All essential tools in one integrated system to run your business efficiently.

Dashboard
Business overview at a glance

POS Sales
Fast & easy sales processing

Products
Manage product catalog & pricing

Stock In / Stock Adjust
Track and adjust inventory

Customers & Returns
Customer management and return handling

Finance & Accounts
Income, expenses and accounts

Warehouse & Production
Inventory, stock batches and production

Employees & Attendance
Staff management and attendance tracking

Payroll
Salaries and employee payments

Reports & Statements
Detailed business reports

Activity Logs
Track system activities and changes

Configuration
System settings and preferences

Modular, scalable and role-based design for efficient business management.

UI / UX Design — Dashboard Overview

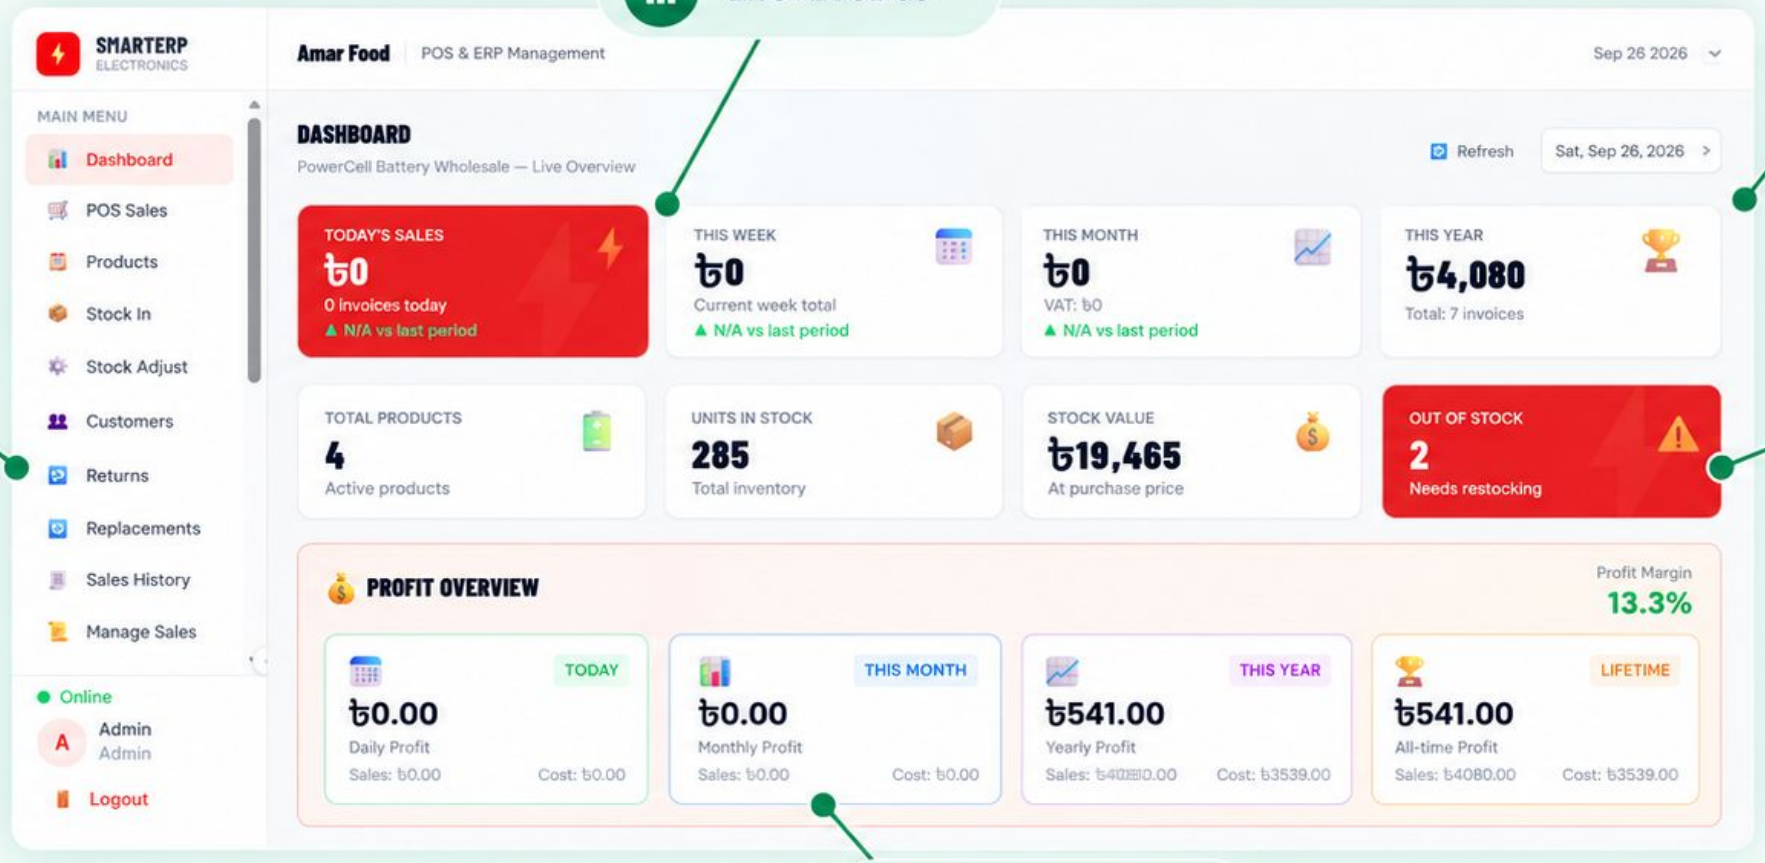

The dashboard is designed for quick visibility, easy navigation and real-time decision support.

Live KPI cards

Minimal, business-friendly layout

Clear side navigation

Stock & sales alerts

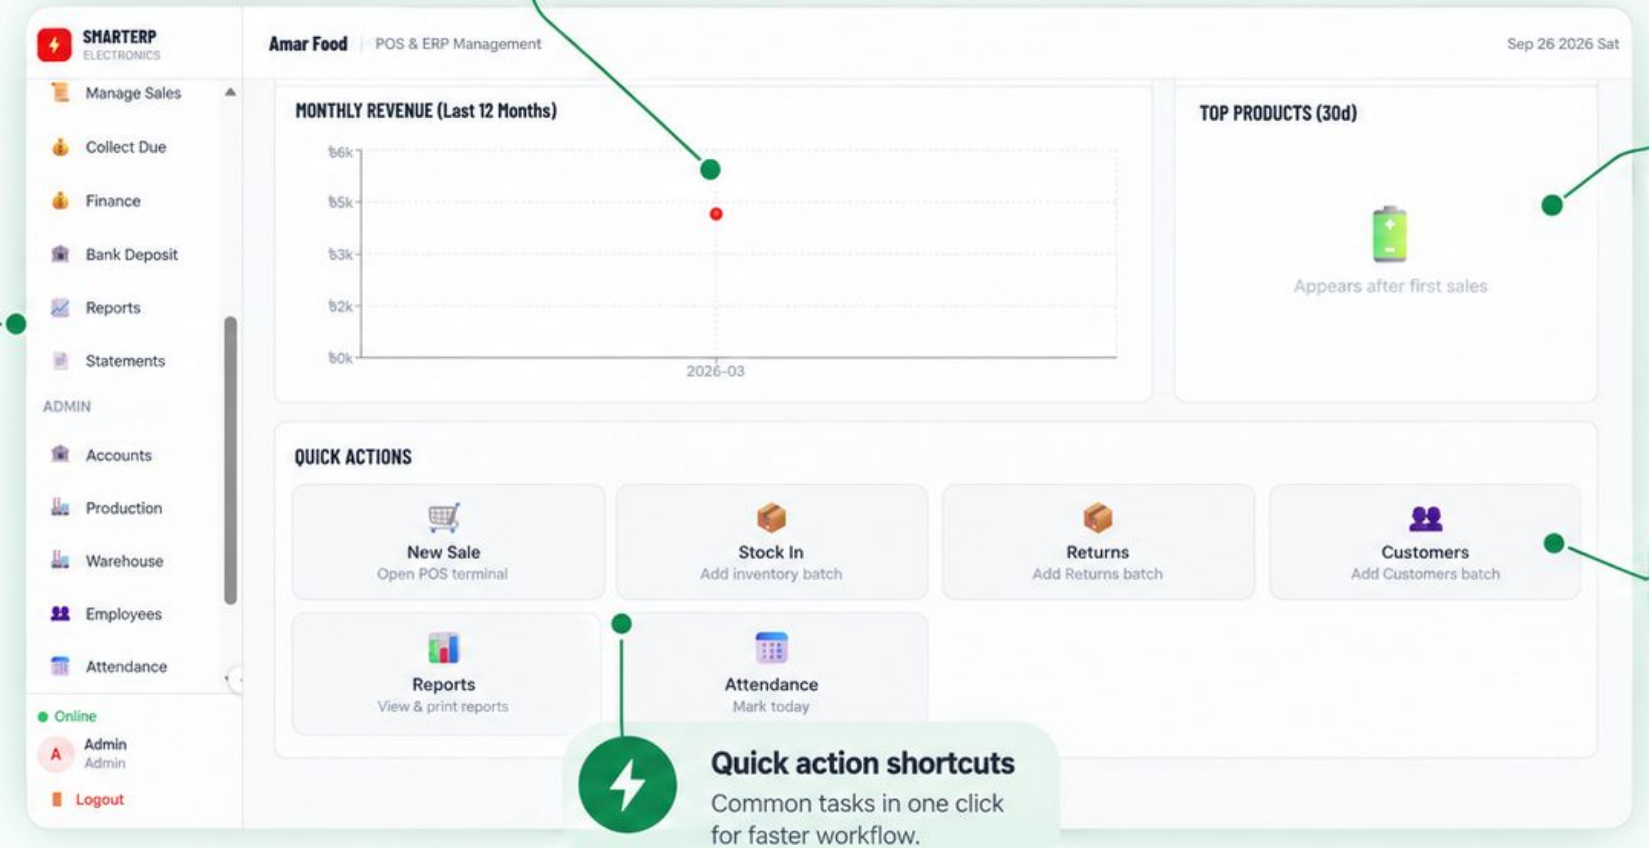

Profit overview

SMARTERP
ELECTRONICS

UI / UX Design — Analytics & Actions

Monthly revenue chart
Track business performance at a glance.

Operational menu access
Easy navigation to all modules and features.

Top products panel
Quick view of best performing items.

Simple, task-oriented workflow
Focus on key operations with clear actions.

Quick action shortcuts
Common tasks in one click for faster workflow.

This screen supports **monitoring, reporting** and faster action from a **single workspace.**

SMARTERP

Benefits & Expected Outcomes

Faster sales and billing operations
Streamlined POS and invoicing for quicker transactions.

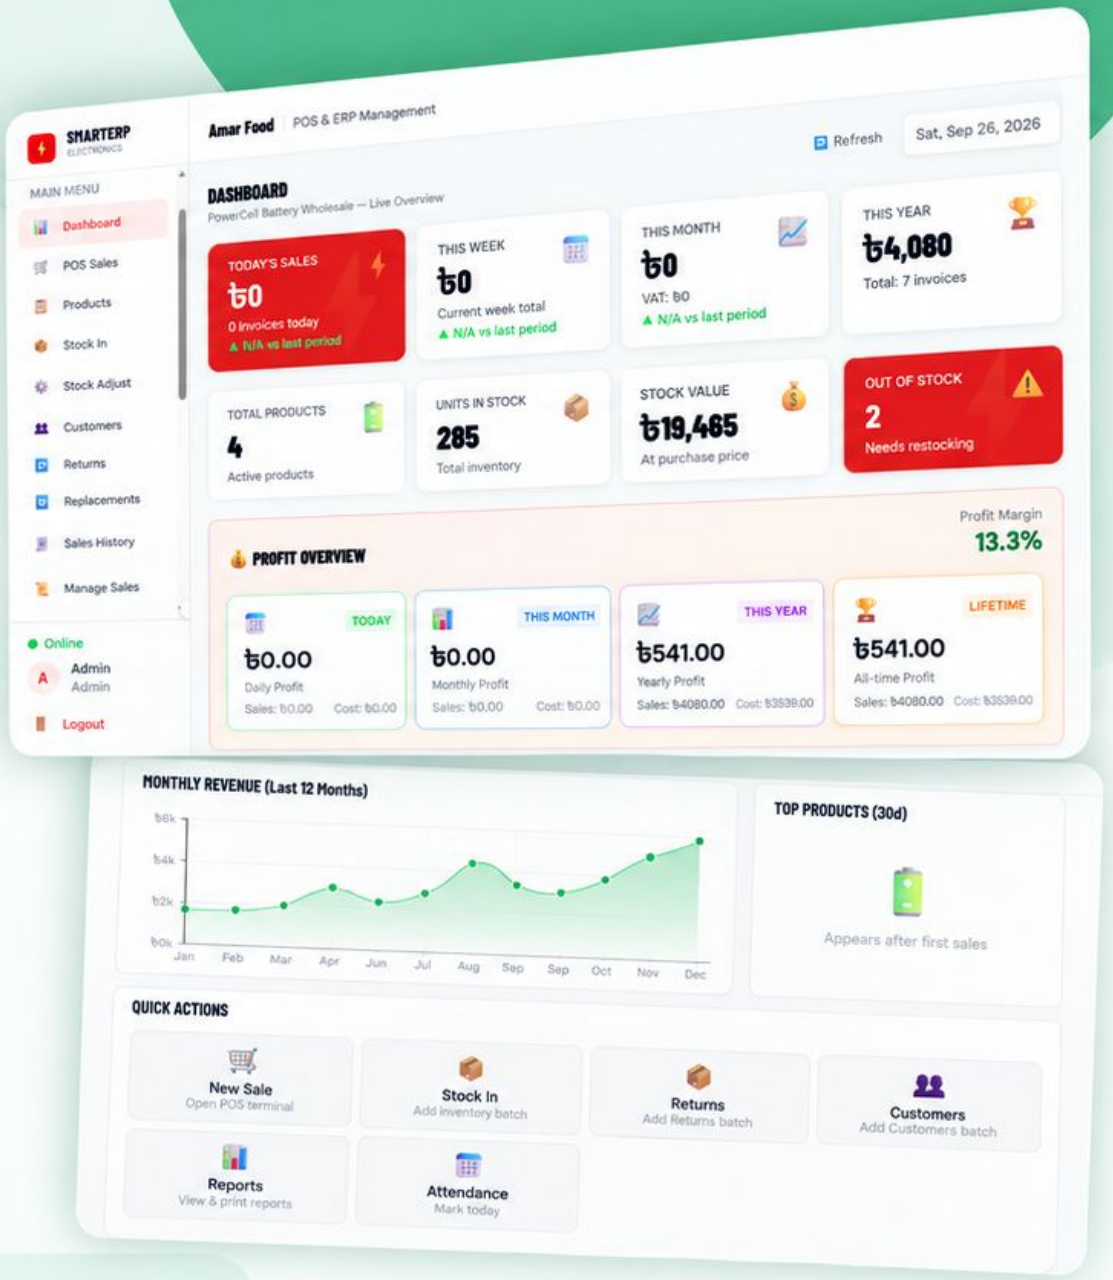

Better inventory control and restocking awareness
Real-time stock tracking and low stock alerts.

Improved financial transparency
Clear view of sales, costs, profits and overall performance.

Organized employee and attendance management
Manage staff, roles and attendance in one place.

Real-time reports for decision-making
Accurate and up-to-date reports anytime.

More efficient and scalable business workflow
Automate daily operations and support business growth.

Outcome: Better control, higher efficiency and smarter management.

Conclusion & Future Scope

SmartERP demonstrates how a unified POS & ERP solution can streamline operations, improve visibility and support better business decisions.

Future Scope

- Mobile app support
- Advanced analytics & AI insights
- Multi-branch management
- Third-party API integrations

Thank You
